

BioBag Composting Systems - UmiMax Buckets & Food Scrap Bags

Quality compost starts in the kitchen...

Kitchen food scraps can build up bacterial odor quickly when collected in a solid plastic, metal or ceramic pail. Many modern collection pails contain charcoal filters or other devices to help mask the odor, but do little to slow the “rotting process.”

The UmiMax buckets are made from 100% post consumer plastic and ventilated on all sides, including the top. When paired with breathable BioBags, the moisture in food waste evaporates which minimizes odors, mold and mildew. The buckets are black, sturdy and come with an easy-to-carry handle that locks the lid tight. Recommended to be used with BioBag Small 3 Gallon Food Waste Bags.

UmiMax Bucket

Small 3 Gallon Food Scrap Bags

Look at these test results of food collected in a solid, non-ventilated container versus food waste collected in a UmiMax Bucket using BioBags:

Approximately 30% of landfill waste is organic matter. By collecting and composting food scraps from your kitchen and your community, you can reduce greenhouse gases and create nutrient rich top soil amendments.

BioBags breathe naturally, allowing moisture to escape or evaporate. This process allows food waste to dry, thus reducing the rate of bacterial build-up, which causes odor. When BioBags are used with the UmiMax Bucket, you'll have the ultimate system for food waste collection.

BioBag Composting Systems - UmiMax Buckets & Food Scrap Bags

BioBag works with communities around the world to provide alternatives to keep food waste, yard waste, and other compostable materials from entering landfills. BioBag's 3 gallon food waste bags are designed to fit most kitchen countertop composting pails. These bags are a great tool to increase food waste collection for composting. BioBag produces the 3 gallon bag for retail and in bulk quantities for communities and business uses.

Great BioBag Features

- Certified Compostable by the Biodegradable Products Institute
- Certified Home Compostable for backyard composting (3 and 13 gallon)
- Breathability, which helps dry food waste
 - Less pests
 - Less mold & mildew
 - Less smell
- Uses GMO free crops (3 and 13 gallon)
- Keeps buckets clean, reduces the "ick" factor
- Star sealed at the bottom for extra strength and durability
- Designed to fit most kitchen countertop containers
- Increases the motivation for sorting waste
- Increases waste collection
- Custom abilities for community programs and pilots
- Approved for use in Green & Brown cart communities

For Best Results

- Use BioBags within 12 months of purchase
- Store in a cool, dry area
- Replace your BioBag every couple of days when exposed to organic matter
- Don't put hot liquids inside BioBags
- If using BioBags with a closed bin, line the bottom of the bin with newspaper or paper towels to soak up condensation moisture
